

Food Services is committed to providing healthy balanced meals to the children of our school sites.

While fundraising that includes selling candy, sodas, and baked goods ensures sales, it also provides empty calories, high fat content, and no nutritional value.

Obesity and Juvenile Diabetes is becoming more and more common with our elementary students . We at Food Services are very concerned with this growing epidemic and are hoping to enlist your support of either nutritional or non-food items as part of your fundraising efforts. Please let us share alternate fundraising ideas and resources .
